António Pedro Portfolio

1. Introduction

- My website idea is to develop a web site with various type of information related to my professional experience.

- The values and benefits this application bring to end-user are tangible and are related to the possibility to any company have access to various professional and personal information related to my own.

2. Expected List of Features

- Website in an initial phase will show information related to my profissional carreer, like professional experience, education, expertise, skills, motivation, gallery of some images of developed software, hobbies and some more extras.

- These features can help any company to be in contact with me in a more efficient way.

3. Market Survey

- I found these websites with similar ideias:

    - https://www.christinavanessa.com/

    - https://www.sophiebritt.com/

    - https://www.stevewolf.co/

    - https://www.wenxinwendyju.com/

    - https://www.krawec.org/

- These applications have more expertise in the area of web design. My website intends to be a simple website in web design and more focused on the exposition of information related to my experience as a software developer.
